PERIODICALS FOR 1944

Listed below are the periodicals the library will take during 1944. There have been some additions and some omissions from our list of 1943. As in the past, you may receive any of these periodicals regularly (as regularly as possible if each man sends one on within his three day time limit) simply by telling us you wish to see it. You will initial and date the routing slip and mail the magazine to the next person on the list. (Please do not skip around on the list.) We ask the co-operation of each of you in keeping the magazines circulating, and we hope that this year not so many magazines will be left lying on desks for a week or two. We are taking additional copies of a number of periodicals so that they will not be so old by the time they reach you--unless our circulation lists grow beyond expectations.

During the next month we shall be revising our circulation lists. We shall retain names now on the lists unless you ask us to remove your name. So if there is any periodical you no longer wish to see, please tell us right away. Please read the list and let us know as soon as possible what additional magazines you wish to receive.

SOME RECENT BOOKS

COMMUNITY LIFE IN A DEMOCRACY, edited by F. C. Bingham. National Congress of Parents and Teachers, 1942. 280.12 N2177

"There is still too great a gap between democracy in theory and democracy as it is actually practiced in our daily lives. These inconsistencies between the ideal and the real are closely examined in this volume in an endeavor to help peo-

ple in all walks of life and in all communities to understand and practice the broad ideals of life in a democracy." Partial contents: The new birth of community consciousness, Life takes the family pattern, for the common good, Character on the American plan, Health for democracy's children, The culture of communities, To guide the growing personality, Surveying the community.

COMMUNITY HYGIENE, by D. F. Smiley and A. G. Gould. Macmillan, 1941. 449.1 Sm4

The sections in this book are entitled Environmental health hazards and their control, The community attack on specific diseases and disorders, Health problems specific to certain groups, and Health agencies. Some of the chapter headings are: Animals as sources of infection for man; Insects and disease; The sanitary significance of soil; The provision of a sanitary water supply; Community problems in mental hygiene; Tuberculosis as a community health problem; The community attack on heart disease and cancer; The community's interest in maternity, infancy, and childhood; The health of the rural population.

CONSUMERS IN WARTIME: A guide to family economy in the emergency, by L. J. Gordon. Harper, 1943. 280 G65C

"Here is a timely guide to the difficulties which everyone faces as a consumer in wartime. Problems of the quantity and quality of needed goods, of rationing, of intelligent purchasing under present conditions, are here faced realistically and helpfully."

A HANDBOOK OF PSYCHIATRY, by P. M. Lichtenstein and S. M. Small. Norton, 1943. 140 L61

Some time ago Mrs. Anna Bond, Chief of Home Management Division, FSA, Dallas, mentioned the FSA Home Management Supervisor's need of a book on psychiatry for the layman. This book was prepared for the student of psychiatry and for all those whose work brings them into contact with mentally disturbed persons. Its aim is to make one familiar with the fundamentals of psychiatry, and while there is no attempt to cover the entire field of mental disease, certain mental diseases most likely to be met with are outlined in a clear and straightforward style with a minimum of technical language.

PERSONAL AND COMMUNITY HEALTH, by C. E. Turner. Mosby, 1943. 449 T85

This book is recommended by Dr. Fishbein as a valuable guide in the prevention of disease and in the maintenance of personal health. It is divided into two parts: Personal Health and Community Health. Selected chapter headings are: Nutrition, Digestion, Circulation, The hygiene of the nervous system, Body mechanics, Heredity and health, The science of disease prevention, Essential facts of immunity, Food control, Water supply, Public health administration, The control of communicable diseases.

TENANTS OF THE ALMIGHTY, by Arthur Raper. Macmillan, 1943. 281.019 R18T

Jonathan Daniels said in SATURDAY REVIEW OF LITERATURE, "Mr. Raper has written about Greene (Greene County, Georgia) but, more important, he has written the small town and rural story of Big Government where it has meaning in the lives of the people. As such, Mr. Raper has in a sense made a new sort of book about the remote results of centralized government... It is an exciting story and one which needed to be told. Factually, Mr. Raper has done the job excellently. Fictionally also in the fine photographs by Jack Delano with which the book begins, the Greene County story is made clear. Somehow, however, while the book gives us all the facts, it remains a document rather than a drama." And the following from a review in COMMONWEAL: "A superb series of FSA plates sets the tone for this deeply human story, informal, colorful and warmly personal throughout 150 years of history."

YOUR COMMUNITY: Its provision for health, education, safety, and welfare, by J. C. Colcord. Russell Sage Foundation, 1941. 280 0674

It seems that this would be an invaluable book to aid one in making a study of a community. In each chapter are the questions that should be answered about the community with suggestions and references for further reading. The chapter headings are: Your community: how to study its health, education, safety, and welfare; Community setting, founding, development; Local government; Provision for dealing with crime; Provision for public safety; Workers, wages, conditions of employment; Housing, planning, and zoning; Provision for health care; Distribution of health care; Provision for the handicapped; Educational resources; Opportunities for recreation; Religious agencies; Public assistance; Special provisions for family welfare; Special provisions for child care; Foreign-born and racial minorities; Clubs and associations; Agencies for community planning and co-ordination.

SOLE SUGGESTED NEW YEAR'S RESOLUTIONS

1. I will return library books promptly so overdue notices will not have to be sent to me. (Books should be mailed so as to reach the library on the date due stamped on the slip in the book. When we charge a book, we allow three days for transportation. In some instances it may take another day.)
2. I will not let magazines lie on my desk unread, but will send them on or have them sent on within the three day time limit in order that others may read them.

A HAPPY NEW YEAR TO YOU ALL
